KEY SKILLS

Playwright	Selenium
Python	Java
SQL	API Testing
Postman	REST Assured
JMeter	Azure DevOps
CI/CD Pipelines	Jenkins
Git	GitHub
GitLab	Poetry
UiPath (RPA)	BDD
Agile/Scrum	Test Management

CERTIFICATIONS

- Microsoft Certified: Azure Database Administrator Associate (DP-300)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- Microsoft Certified: GitHub Actions (GH-200)
- A1 Certified in French language
- Reinvention with Agentic AI - Learning Program by Accenture

EDUCATION

Bachelor of Engineering (B.E.)
Information Technology

ACHIEVEMENTS

- Apex Award – Accenture
- Star Performer Award
- Client Appreciation Awards
- Led Automation Framework Modernization
- Mentored and led high-performing teams

PROFESSIONAL SUMMARY

QA Automation Lead with 8.5 years of experience in Test Automation, Test Management and Quality Engineering across Insurance, Banking, Capital Markets and Retail Banking domains. Currently leading automation strategy at Accenture, specializing in Playwright with Python, framework development using Poetry, Azure DevOps CI/CD pipelines, API & database testing, performance testing and RPA automation. Passionate about building scalable frameworks, mentoring teams and delivering high-quality enterprise solutions in Agile environments.

PROFESSIONAL EXPERIENCE

Accenture

September 2024 – Present

Team Lead – QA Automation

- Client:** Lloyd's of London **Domain:** Insurance
- Leading automation strategy and quality initiatives for enterprise insurance applications.
- Designed and implemented a Playwright-Python automation framework using Poetry with BDD and Page Object Model.
- Integrated automation suite into Azure DevOps CI/CD pipelines.
- Developed reusable utilities for API, Database, PDF and Azure DevOps Test Plan validations.
- Worked with GenRocket for synthetic test data generation and data masking.
- Implemented Self Healing concept in the automation framework.
- Built automated AI agents and bots for test case creation.
- Built skills file for automated feature file, methods and page class creation using GitHub Copilot integrated with VS Code.
- Owned test planning, estimation, execution strategy and release validation.
- Mentored automation engineers and conducted code reviews.
- Collaborated with Product Owners, Developers and Business Analysts in Agile teams.
- Driving automation improvements, reducing manual regression effort and increasing test coverage.

Tata Consultancy Services

August 2017 – August 2024

IT Analyst

- Clients:** London Stock Exchange Group (LSEG), Santander UK
- Domains:** Capital Markets | Investment Banking | Retail Banking
- Developed Selenium (Java) automation frameworks for banking and financial applications.
- Performed functional, regression, smoke, sanity, API and backend database testing.
- Created SQL queries for data validation and backend verification.
- Designed and executed test scenarios, test cases and test summary reports.
- Managed defects and test execution using JIRA and Zephyr.
- Involved in UAT, system integration testing and Agile delivery.
- Led migration activities and mentored junior team members.

KEY PROJECTS

Enterprise Automation Framework

- Playwright with Python + Poetry
- BDD + Page Object Model
- API, Database & UI Automation
- Integrated with Azure DevOps Pipelines
- Reduced regression effort by 70%
- Improved test coverage by 60%

Azure DevOps Test Management Utility

- Automated Test Plan updates of test cases
- Bi-directional sync (Execute & Define)
- Custom REST APIs using Python
- Pipeline-triggered execution
- Improved visibility and reporting

Test Data Generation Utility

- Developed a test data generation utility using GenRocket(third party tool)
- Generated synthetic and masked data for testing.
- Integrated GenRocket with multiple applications.
- Created reusable test data scenarios.
- Reduced manual test data preparation efforts.
